

Sunair Anwar

Software Engineer | Full Stack Web & Mobile App Developer

+92 308 2011585 | sunairahmed9908@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | Karachi, Pakistan

Summary

Full Stack Web and Mobile App Developer and Academic Leader with 2+ years of experience in software engineering, training, and education management. Proficient in MERN Stack, Next.js, .NET, and core computer science concepts. Progressed from Junior Faculty to Center Academic Head, successfully guiding academic delivery and mentoring engineering students, while also delivering high-quality freelance software products.

Technical Skills

- Frontend: React.js, Next.js, JavaScript, TypeScript, HTML5, CSS3, Responsive Web Design
- Backend & Databases: Node.js, Express.js, ASP.NET Core/.NET, C#, REST APIs, MongoDB, MySQL, SQL Server
- Mobile Development: React Native, Expo
- Core Development: JWT Authentication, Payment Gateways, Role-Based Authorization, CRUD Operations, Search, Filter, Pagination, API Integration, Sockets, chatbot, AI integration
- DevOps & Deployment: Git, GitHub, Docker, Containerization, CI/CD Pipelines, GitHub Actions, Vercel, Environment Variables, Production Configuration
- Professional: Freelance Web Development, Teaching, Student Mentoring, Academic Management, Team Leadership, Curriculum Planning

Professional Experience

Center Academic Head | Aptech Learning Pakistan

Oct 2025 – Present

- Direct academic operations and coordinate a faculty team of 10+ educators, ensuring high-quality syllabus delivery for 500+ active students.
- Lead the development, maintenance, and regular optimization of 3+ internal software systems alongside administrative responsibilities, increasing workflow efficiency by 20%.

Freelance Full Stack Web & Mobile App Developer | Freelance

2024 – 2026

- Created and delivered 7+ live full-stack solutions using MERN Stack and Next.js, achieving a 98% client satisfaction rating.
- Built responsive web applications, integrating 15+ key features including secure OAuth, role-based access, Stripe payments, real-time chat, and file uploads.
- Managed deployment pipelines on Vercel and automated repository builds via GitHub Actions, reducing manual deployment times by 15%.

Senior Faculty (Full-Time) | Aptech Learning Pakistan

Feb 2025 – Sep 2025

- Conducted 40+ hours of weekly technical training in MERN Stack, .NET Core, React, and database design across multiple batches.
- Mentored 150+ students on real-world portfolio projects, enabling over 85% of graduates to secure internships and entry-level developer roles within 3 months.

- Instructed student cohorts of 100+ learners in programming fundamentals (C#, Java, JavaScript) and modern web technologies.
- Guided 30+ student capstone projects and provided active development assistance for internal center software and technical tools.

Education

Bachelor of Science in Computer Science (BSCS) | University of Karachi, UBIT 2022 – 2026

Advanced Software Engineering (Diploma) | Aptech Learning Pakistan 2022 – 2025

- Grade achieved: A Grade

Intermediate | Govt. Delhi College 2021

- Grade achieved: A Grade

Matriculation (Science) | S.M. Public School 2019

- Grade achieved: A+ Grade

Projects

MERN Stack Live Projects

SaaS-Based Multi-Vendor E-Commerce Platform | MERN Stack *Live*

- Engineered a MERN Stack e-commerce platform featuring distinct customer, vendor, and admin panels, incorporating seller verification and role-based permissions.
- Integrated Google OAuth, two-step verification, password recovery, Stripe payment gateway, Socket.io chat, and an AI-driven chatbot helper.
- Enhanced search efficiency via MongoDB Atlas indexing, integrated Cloudinary storage, and designed a fully responsive UI.
- **Live Demo:** <https://saas-based-ecommerce-website-fronte.vercel.app/>
- **GitHub:** <https://github.com/sunairahmed99/Saas-Based-Ecommerce-Website-Frontend>

SaaS-Based Apni Zameen Property Management Platform | MERN Stack *Live*

- Engineered a scalable property management system with dedicated vendor and admin panels, optimized to store and query 200,000+ property records.
- Enabled property list submissions, purchase workflows, agency management, Google Sign-In, user profile forms, and live chat dialogs.
- Deployed instant property searches, multi-criteria filtering, performance tuning, and administrator dashboards.
- **Live Demo:** https://apni-zameen-frontend.vercel.app/?utm_source=chatgpt.com
- **GitHub:** https://github.com/sunairahmed99/ApniZameenFrontend?utm_source=chatgpt.com

Event Planning & Management Platform | MERN Stack *Live*

- Built a responsive event organization portal featuring secure user sign-up, authorization routes, and custom role permissions.

- Configured email/password login, Google Login integration, protected routing, user profiles, and separate access permissions for different user roles.
- Integrated real-time communications using Socket.io, including a custom chat service to support user interaction and instant messaging.
- Crafted event-related workflows, modular React components, backend API integration, and user interfaces tailored for mobile and web screens.
- Connected MERN APIs for authentication, database CRUD operations, and administrative functions.
- **Live Demo:** <https://event-planning-frontend.vercel.app/>
- **GitHub:** https://github.com/sunairahmed99/Event_planning_frontend

Restaurant Ordering & Management Platform | MERN Stack

Live

- Built a responsive online restaurant ordering site with a full menu catalog, cart utility, checkout form, and order execution workflow.
- Designed secure user authentication protocols and restricted routing for account dashboards, purchase logs, and client details.
- Programmed add-to-cart functionality with real-time price computations, quantity selectors, and automated checkout processes.
- Added real-time order tracking mechanisms, allowing customers to monitor delivery status instantly.
- Constructed an admin console to manage menu items, category filters, and incoming customer transactions.
- Integrated Socket.io to establish real-time order notifications and statuses between customers and restaurant management.
- **Live Demo:** <https://resturant-frontendd.vercel.app/>
- **GitHub:** https://github.com/sunairahmed99/Resturant_frontendd

YouTube Video Streaming Platform | MERN Stack

Live

- Built a YouTube clone application connecting with live YouTube APIs to fetch and display real-time video categories, channels, and search lists.
- Enabled seamless video playback features, allowing users to watch selected streams directly in-app.
- Used React state hooks to coordinate API responses, selected videos, searches, loading states, and responsive interface states.
- Built search fields to query live APIs and display matching results dynamically in a mobile-friendly layout.
- Created modular React elements for video cards, sidebar directories, search fields, and media players.
- Designed user interfaces optimized for fluid layouts on desktop and mobile screens.
- **Live Demo:** <https://youtube-one-lyart.vercel.app/>
- **GitHub:** <https://github.com/sunairahmed99/youtube>

Next.js Live Projects

Restaurant Management & Ordering Platform | Next.js

Live

- A full-stack restaurant ordering platform built on Next.js, featuring a dedicated admin panel for managing menu items, orders, and customers. Architected add-to-cart flows, real-time socket order updates, and automated email confirmations.
- **Live Demo:** <https://resturent-project-opal.vercel.app/>
- **GitHub:** <https://github.com/sunairahmed99/ResturentProject>

NextShop E-Commerce Platform | Next.js

Live

- A full-stack e-commerce platform built on Next.js, featuring product browsing, cart management, and a complete checkout flow. Established secure authentication, role-based admin controls, two-factor authorization, and socket notifications.
- **Live Demo:** <https://next-shop-ecommerce-p-latform.vercel.app/>
- **GitHub:** <https://github.com/sunairahmed99/NextShop-Ecommerce-Platform>
